

Jason Yang

Wellington, New Zealand | jason.yang.sd@gmail.com | [Portfolio](#) | [GitHub](#) | [LinkedIn](#)

Professional Summary

Master of Software Development graduate from Victoria University of Wellington with Java experience gained through postgraduate coursework and full-stack project experience using C#/.NET and Next.js. Contributed features, automated tests and defect investigation in a six-person Agile team. Brings prior R&D experience in product validation and data analysis.

NZ work rights: Open work visa

Technical Skills

Languages: Java, C#, TypeScript, JavaScript, Python, SQL

Backend & Data: ASP.NET Core, Entity Framework Core, REST APIs, JWT, Swagger/OpenAPI, PostgreSQL, Supabase

Frontend: React, Next.js, HTML/CSS, Tailwind CSS

Testing: xUnit, Moq, Jest, React Testing Library

Tools & Workflow: Git/GitHub, Docker, Docker Compose, GitHub Actions (CI), code reviews

Software Projects

Worker Data Platform | [GitHub](#)

University / industry-linked team project with First Step Solutions. Proof of concept giving workers control over employer access to their data.

- Built worker and employer dashboards and integrated data-access workflows using Next.js, TypeScript, ASP.NET Core, Entity Framework Core and PostgreSQL/Supabase.
- Implemented access-control workflows for item-level approval and rejection, active-access filtering and worker-controlled access expiry.
- Integrated worker-facing blockchain audit views for access events, with personal data kept off-chain and PostgreSQL as the primary application data store.
- Contributed backend tests using xUnit/Moq and frontend tests using Jest/React Testing Library; worked in a repository with GitHub Actions CI for backend and frontend checks.
- Investigated expiry-date persistence and authentication-state restoration defects, tracing behaviour across frontend, backend and persistence layers.
- Collaborated in a six-person Agile team through code reviews, sprint planning, integration testing and client demonstrations.

Education

Master of Software Development Victoria University of Wellington	July 2025 – June 2026
--	-----------------------

Master of Power Engineering & Engineering Thermophysics Jiangsu University	Sept 2015 – June 2018
--	-----------------------

Bachelor of Engineering in Thermal Energy & Power Engineering China University of Mining and Technology	Sept 2010 – June 2014
---	-----------------------

Work Experience

Investment Operations & Fund Research Huaxi Securities / Shanxi Securities	Apr 2022 – Jan 2024
--	---------------------

- Researched and screened private funds for potential investment by analysing fund performance, asset and market data against the firm's investment criteria.
- Used Python to process and organise Excel-based fund data, supporting fund comparison and investment evaluation.

R&D Engineer BOE Technology Group	July 2018 – Jan 2021
---	----------------------

- Led validation of new display products, including flexible and foldable displays, from demo builds through pre-production, coordinating with project managers, design and manufacturing teams.
- Investigated performance and yield issues by analysing test and production data, adjusting process parameters and retesting against mass-production requirements.
